EXPERIENCE

Software Consultant

Agiliron Inc.   **November 2022 - Present**

- **Developing and Maintaining a Warehouse Management App**: Create and enhance a progressive web application to optimize warehouse operations.
- **Bug Resolution**: Proactively address bug reports submitted by customers and the QA team, ensuring a smooth user experience in the warehouse management app.
- **Feature Development**: Collaborate on bug tickets and implement new features in the Agiliron primary backoffice platform to improve functionality and user satisfaction.

Program Manager

Webspace Studio Private Limited   **June 2020 - October 2022**

- **Recruitment and Store Planning Platform**: Developed a comprehensive platform tailored for a Japanese client to streamline recruitment processes and optimize store planning.
- **API Service Development**: Created an API service for an event management web application, enhancing functionality and integration for a Japanese client.
- **Team Leadership**: Led a team of software developers in documenting, planning, and executing projects, ensuring alignment with client requirements and project goals.

Senior Software Engineer

Toolyt   **March 2019 - April 2020**

- **Sales Enablement Platform**: Collaborated with developers to implement new features for a sales enablement platform, enhancing its functionality and user experience.
- **Bug Resolution**: Addressed and resolved bug tickets reported by customers, QA, and testers, ensuring a smooth and reliable application performance.

Associate Software Engineer

Indglobal Private Limited   **MAY 2018 - January 2019**

- **AI-Powered Healthcare App**: Developed API services for an AI-driven healthcare application, enhancing data integration and functionality.
- **BYJU's Employee Analysis and Management Software**: Contributed to the development of software for employee analysis and management at BYJU's, improving workforce insights and operational efficiency..

Associate Software Engineer.

Ranium Systems   **January 2017 - March 2018**

- **Backend Module Development**: Developed various backend modules to enhance bulk data integration for both offline and online stores for Eve Sleep, a client specializing in online mattress sales.
- **Bug Resolution**: Proactively addressed daily critical bug tickets from clients, ensuring a seamless user experience on the e-commerce platform.
- **Laravel Upgrade**: Successfully upgraded the front-end store from an older version to the latest Laravel version, meticulously testing each module and optimizing for SEO throughout the process.

Junior Software Engineer

Prometheus Technologies Private Limited   **January 2016 - January 2017**

- **UI and Database Bug Fixes**: Resolved UI and database-related issues to enhance the user experience for a product comparison platform.
- **Data Crawling Service Development**: Developed a service to crawl essential data from various e-commerce platforms, allowing users to easily access and compare relevant product information.

FREELANCE PROJECTS

Travel and Tourism Platform

- **Tour Package Web Platform**: Developed a comprehensive web platform for creating and listing tour packages for customers. The platform includes a complete quotation workflow, allowing users to request quotes for specific packages. Enabled back office customer representatives to manage the entire quote process, including customer communication, tour management, payment processing, and easy document access, ensuring a seamless experience from inquiry to tour completion.

Logistic Software

- **Comprehensive Logistics Solution**: Delivered a logistics software platform capable of handling docket creation, editing, and tracking services for each docket, along with efficient management of all related documents. The platform facilitates the management of various branches within the logistics company, ensuring streamlined operations across locations. Provides detailed analysis reports to offer insights into customer behavior and business performance, enhancing decision-making processes.
